Easy Installation

With 40 years of power equipment experience, WFCO knows what is important to our customers. High on the list is easy, fast installation. Our WF-8500-MBA Series is a quick, easy replacement part for all power centers. It installs easily with only two screws, three AC wires, and two DC wires. With no need to re-wire, installation is only 10 minutes! Customers also have the option for Reverse Polarity Detection that meets new RVIA & NEC requirements with an audible alarm notification. No additional wiring or hookup required and accepts hi-pot testing.

SMART ENGINEERING: THREE-STAGE CHARGING IS BETTER

WFCO's automatic three-stage converter handles every charging need for the RV while extending the battery's life. Well-maintained batteries should never need more than two-stage (Normal and Trickle) charging. Our third stage (Bulk) is provided for the rare times a battery needs extra-power for charging. See wfcoelectronics.com for details.
